Participation of Students to the Web Conference:

Students can install the Webex application on their mobile device, tablet or PC at https://metu.webex.com. Clicking on the link in the course invitation sent by the SFL through various communication channels (e-mail, METUClass, etc.), this application is automatically opened and participation is provided.

The Webex address the students have to join on the EPE day will be sent via email at least one day prior to the exam.

If the students click on the link to be sent without installing any application, they can participate in the session via the web browser. The student participates in the session by entering his / her name, surname and e-mail address.

Note: Some old version web browsers may not connect to Webex. In this case, the student will need to install the free Webex application.
