Musical Club

The musical club was included by students in 2013. Our campus is one of the very few university campuses, in Northern Cyprus and Turkey, where a musical club has been formed. Since it was created, both front and back stage members of the club have worked in collaboration to perform on stage by blending music, rhythm, dance and drama. The musical club equippes its members with musical knowledge, core techniques to develop and protect the voice, drama techniques, and basic dance steps through the rehearsal process. The club try to produce professional musicals with an amateur spirit by combining the support of directors with the skills and creativity of members, within a family that grows each year.
