

Registration of Electronic Devices

Dear Friends,

You need to register your electronic devices in order to use the school's internet **when you arrive to the campus.**

- First of all, you must activate your user account from <https://useraccount.metu.edu.tr/newstudent/> **You have to do this before you come to campus.**
You can find a helpful video here: (<https://www.youtube.com/embed/448xid3NCTI?rel=0>).
- Then you can register your devices from <https://netregister.ncc.metu.edu.tr/> with provided internet access temporary password (it will be sent via e-mail on February 3rd).
- **You need to carry hard copy of your temporary internet password because you cannot have internet when you arrive to the campus. The Wireless internet coverage area is limited to general usage areas of the campus, and your dormitory room is not one of these areas. You will only have a cable internet connection option in your dormitory room. If your mobile device doesn't have a cable internet connection, you should buy an External USB ethernet adaptor with 802.1x Network Authentication capability. If your External USB ethernet adaptor does not support 802.1x, you will not be able to use the internet connection in your dormitory room.**
- If you have any problem your orientation leader is ready to help you.
- If you cannot complete your registration and have a problem about it, you can schedule an appointment from https://intranet.ncc.metu.edu.tr/bilisim_yardim_masasi.php after February 20th.
