## **INSTALLING SAFE EXAM BROWSER (SEB) FOR MAC**

SEB is a web browser that prevents users from opening new tabs on their computers or visiting new web pages during online exams, rather than those relevant to the exam. To be able to take your midterm exams and final exam, you must install SEB on the computer that you will use to take your exams. Please follow the steps below to complete the set-up of SEB:

**1.** Type "safe exam browser mac" into your search engine and go to safexambrowser.org (the first result provided by Google).

**2.** Dowload the version for macOS.

**3.** Drag the Safe Exam Browser icon into the Applications file in the window that will appear.

**4.** Open the Safe Exam Browser app, which is located in the Applications file.

**5.** When the app is open on the screen, click SafeExamBrowser next to the Apple logo at the top and select "Preferences" from the drop-down menu.

**IMPORTANT NOTE:** The page <u>should not</u> be in full screen mode, otherwise, you cannot see the text SafeExamBrowser.

**6.** Type <u>https://odtuclass.metu.edu.tr/</u> into the **"Start URL"** section in the small window that will appear and click the "Restart SEB" button. Then click the "Apply" button in the small window that will appear.
