FORMAT AND APPEARANCE
Photocopies must be made from the original, and all pages must have high contrast with consistently dark print throughout the thesis. <i>Inferior copies and copies not made on approved paper will not be accepted.</i>
The font size should be the 10-12 point. Any standard font (e.g., Arial, Bookman, Palatino, Tahoma, Times New Roman, and Verdana) is acceptable. Do not use a script or ornamental fonts. The font type and font size must be consistent throughout the thesis. Boldface letters, symbols, and italics may be used for particular emphasis and foreign words.
All theses must be printed by using laser printers. If you are uncertain about the quality of your printer, bring a sample page to the Board of Graduate Programs for review.
No ink corrections, strikeouts, correction fluid, correction tape, paste-ups, insertions between lines, or letters are permitted on the final bound copies. If you must make corrections, make them on the original manuscript (but not by ink corrections or strikeouts which are never allowed) before it is copied for reproduction.
The general text of the manuscript must use 1.5 or double line spacing ; tables, long quotations, footnotes, endnotes, bibliographies, and captions may be single-spaced.
All master's theses are to be bound in blue cloth. Synthetic, leatherette or similar cloths are not acceptable. A bound copy of the thesis should measure 215 by 285 mm (Both Paper and Cardboard Dimensions). The inside margin (binding side) must be at least 4 cm wide to allow for binding; the other three margins must be at least 2.5 cm wide. The top margin of all the pages with headings must be at least 3.5 cm and must be of the same length. The bottom margin must be at least 2.5 cm, and page numbers must be inside the bottom margin.
Page numbers must be at least two single spaces above or below the nearest line of the text.
All pages must be numbered consecutively, including pages containing illustrations, tables, figures, plates, and photographs.
For preliminary pages, use small Roman numerals (iii, iv, v, etc.). <i>The Title page and the Approval page do not have page numbers but count as pages i and iii, respectively. Use Arabic numerals beginning with "1" on the first page of the text and continue throughout the rest of the thesis, including bibliography, appendices, and vita.</i>
The pages should be two-sided. Among preliminary pages, only the title page should be one side.
THE PARTS OF THE THESIS
All headings and titles should be presented in the same way, in terms of capitalization, placement, kind of type used, point size, etc. including; all Preliminary Pages, Chapters, Appendices, References & CV.
All headings should be in all capitals and centred between the text margins, 3,5 cm from the top of the page.
Title page; must be single-spaced, in all capital letters, and should begin at 3.5 cm from the top of the page. If necessary, long titles can be written in multiple lines avoiding unnecessary line breakages. Information retrieval systems consulted by many scholars to locate theses and dissertations relating to their work use keywords in the title. Consequently, the title must not contain any chemical or mathematical formulas, symbols, or other non-standard abbreviations or characters if it is not possible to print them on the cover page. Thus, such information must be substituted for words.
Approval page; must be corrected according to the sample approval page.
